

Woodworkers Unite

Tensor® Adhesive consultants felt right at home during the AWFS Fair 2017 this last July. The tradeshow has consistently provided a marketplace and showcase for goods and services, such as industrial adhesives that are either specifically designed for or used by the broad woodworking and furnishings industry. Tensor's Sales and Marketing Director, Doug Twyford, shared three pain points that were consistently mentioned by woodworking professionals at the tradeshow.

TensorGrip® - C09 - Polyurethane Foam Bead Adhesive

Manufactured specifically for the construction industry, TensorGrip® C09 is a single-component moisture cured polyurethane adhesive designed to provide excellent bonding strength while offering the chemical and moisture resistance properties consistent with polyurethane. Efficient and easy-to use application system.

Advantages:

- Single component
- Moisture cure
- Fast application and controllable bead
- Structural strength in 24 hours or less
- Water & chemical resistant
- Temperature resistant to > 400°F (200°C)
- More cost effective than traditional cartridges

TensorGrip® - EP0-CAL - Low Odor, Low VOC Reefer Repair Adhesive

Manufactured specifically for timely reefer trailer repairs, the TensorGrip® system eliminates blocking and bracing, reduces cure time to 5 minutes, and lets you successfully repair a full refrigerated trailer wall in 45 minutes with low odor.

Advantages:

- New low-odor formula!
- Reduce refrigerated trailer repair time from 24 hours to 45 minutes on a full wall
- Compliant with California VOC laws
- Fast dry with excellent initial bond
- Good heat resistance (up to 180°F)
- Aggressive; high-strength, permanent bond
