

## The New Community Pharmacy Concierge Consulting Service for Today's Assisted Living Facilities.

Find out how Community Pharmacy can take medication management to the next level with measurable cost savings for your facility.

## Allowing you to focus on what really matters—patient care.

At Community Pharmacy, we know it can be hard to ensure clinically sound medication management without a dedicated health partner who knows you and has time to really address your resident's health concerns.

That's why Community Pharmacy is different. From the first day, our customized pharmaceutical team collaborates with residents and their caregivers are encouraged to have an active role in enhancing the quality of the resident's life.

Working as partners, our professional pharmacy staff takes the extra step to deliver residents a tailored, comprehensive medication plan that delivers in-depth knowledge and one-on-one support.

The concierge pharmacists not only take the time to manage prescription drug refills, but also looks for generic or cost-saving alternatives that benefits the facility as well. The team evaluates their medication regimen and help improve outcomes, which decreases readmitted to the hospital because of poor medication management.
